1. GENERAL PRECAUTIONS

Read the instructions and warnings in this manual carefully before handling SARSILMAZ products for any purposes. As a prerequisite for SARSILMAZ products you must be familiar with and follow the information provided in this manual. Please read the instructions for safety and use thoroughly and carefully before handling the firearm. If you need any further information please consult your dealer or the factory.

Please observe the laws of your region and/or your country governing the purchasing, handling, and use of firearms.

All firearms are dangerous. Therefore, your product is sold to you provided that you comply with all instructions for use. SARSILMAZ disclaims in advance any and all responsibility for any technical damage and/or other consequences whatsoever that may be caused by; the misuse of the product, including any property damage or injury/death arising in relation to the following;

- Always keep the muzzle pointed in a safe direction.
- Firearms should be unloaded and secured when not in use.
- Do not rely on your firearm’s safety.
- Be sure of your target and what’s beyond it.
- Make sure that your ammunition matches the caliber or gauge of your gun.
- If your pistol fails to fire when the trigger is pulled, keep muzzle pointed in a safe direction for at least 10 seconds, if round does not fire, rack slide to eject faulty cartridge. Once ejected continue firing.
- It is your responsibility to ensure that you are in compliance with all applicable laws and ordinances regarding the use of your firearm.
- Other factors directly or indirectly of beyond our control.
2. GENERAL RULES FOR SAFETY

2.1. ALWAYS KEEP YOUR FIREARM POINTED IN A SAFE DIRECTION.
Never point a firearm at yourself or anyone. This is particularly important when loading or unloading the firearm. Always be aware of what is behind your target. If you miss or hit your target, it is your responsibility to ensure your shot will not cause unexpected injuries or damages.

2.2. ALWAYS TREAT EVERY FIREARM AS IF IT IS LOADED.
Do not take anyone’s word that the firearm is unloaded – always check for yourself. Assume your firearm is ready to fire unless you have visually checked that the firearm is unloaded.

2.3. HIDE YOUR GUN OUT OF CHILDREN’S SIGHT.
It is your responsibility that your firearm is not accessible to children and other unauthorized persons. It is highly recommended that you store your firearm unloaded and secured with ammunition stored separately. This will ensure minimizing the risk of accidents involving children and unauthorized persons.

2.4. NEVER SHOOT AT HARD SURFACES OR WATER.
Shooting at water or hard surfaces can cause changes in the direction of the bullet which may result in injuries of your own, others, and/or property damage.
2.5. NEVER USE ALCOHOL OR DRUGS THAT MAY IMPAIR MENTAL OR PHYSICAL ABILITY WHILE SHOOTING/HANDLING FIREARM.
Do not use your firearm if you are impaired by alcohol, drugs, and/or medications that will hinder your physical and mental abilities.

2.6. FOLLOW PROPER MAINTENANCE PROCEDURES FOR YOUR FIREARM
In order to prevent accumulation of dirt or dust on operating parts, store your firearm in its original case once properly cleaned. Lubricate and clean your gun after every use following the instructions in order to avoid any corrosion, barrel damage, and dirt. Before loading the barrel, always check to see if it is completely clean (completely free from any obstructions such as dirt, mud, oil, ammunition or ammunition residuals). Shooting against an obstruction can cause an increase in pressure and may damage your firearm and cause injury to yourself and others. If the operation of your handgun has changed the way it sounds, stop firing, make sure the firearm is pointed in a safe direction, and unload the firearm. Check the chamber and barrel bore for any failure. Using incorrect types or calibers of ammunition may cause the firearm to jam.

2.7. USE PROPER AMMUNITION.
Only use factory-loaded ammunition that is newly manufactured within industrial specifications. Ensure all cartridges used are compatible with the caliber and type of your firearm. Avoid using MP5 bullets!
2.8. ALWAYS WEAR SAFETY GLASSES AND EAR PROTECTORS SPECIFIED FOR FIREARM USE.
A shooter should always wear impact-resistant safety glasses and ear protectors when using any firearms to prevent hearing and sight damage.

2.9. OBSERVE THE RULES!
Observe all local and general rules regarding the handling, use and transportation of firearms.

2.10. ENSURE THAT YOU HAVE A FULL UNDERSTANDING OF THE SAFETY FEATURES OF YOUR PISTOL.
Never rely on only the safety to prevent accidents. It is your obligation to make yourself familiar with and utilize the safety features of your gun. The best way to prevent accidents is to follow the rules for safety and safe handling procedures defined in the product manual.

2.11. NEVER ALLOW A FIREARM TO BE USED BY INDIVIDUALS THAT DO NOT UNDERSTAND ITS SAFE OPERATION OR HAVE NOT READ THESE FIREARM SAFETY RULES.
2.12. NEVER LEAVE A FIREARM UNATTENDED AND IN REACH OF AN UNAUTHORIZED PERSON. THIS MAY RESULT IN THEFT OR MAY EVEN POSE A THREAT TO OTHERS, CAUSING DAMAGE OR EVEN DEATH. ALL RESPONSIBILITY WILL BE YOURS.
2.13. IT IS IMPERATIVE THAT YOU KEEP YOUR FIREARM UNLOADED IN A SAFE AND SECURED LOCATION.
2.14. NEVER ATTEMPT TO REMOVE AN OBSTRUCTED PROJECTILE IN THE BARREL BORE THROUGH FIRING ANOTHER ONE. UNLOAD FIREARM AND SEEK A QUALIFIED GUNSMITH.
2.15. MAKE SURE YOU ARE FAMILIAR WITH THE OPERATIONS BEFORE USING AND LOADING THE FIREARM.
2.16. ALLOW ONLY AUTHORIZED/QUALIFIED GUNSMITHS TO UNDERTAKE REPAIR PROCEDURES.
2.17. IT IS BOTH DANGEROUS AND FORBIDDEN TO MAKE MECHANICAL MODIFICATIONS ON ANY PART OF THE FIREARM. PLEASE NOTE THAT ANY PRODUCTS TREATED THIS WAY WILL BE EXCLUDE THE ENTIRE FIREARM FROM WARRANTY.
2.18. USER OF THE FIREARM SHOULD STAND AT A REASONABLE DISTANCE FROM OTHER PERSONS.
2.19. AVOID SQUEEZING THE TRIGGER IN EXCESS.
3. PRODUCT AND FEATURES IDENTIFICATION

3.1. SUPPLIED COMPONENTS

The package supplied includes;

• 1 pistol case
• 1 pistol
• 2 magazines
• 1 manual and maintenance kit
• 3 sizes of back and side straps (S, M, L)
• 1 cleaning and lubrication kit
  ◊ Wire brush
  ◊ Brush
  ◊ Cleaning rod
  ◊ Protecting oil
  ◊ Punch

Note: Case might be expanded as per request.
3.1.1. AKSESUAR ve AVADANLIKLAR
3.1.2. ACCESORIES

Note: The accessories below are not shipped with the firearm. Please contact SAR USA for further questions on available accessories.

- Flashlight
- Tritium lighted rear sight
- Tritium lighted front sight
- Adjustable rear sight (windage and elevation)
- Adjustable front sight (elevation)
- Laser pointer
- Holographic sight

3.2. MAIN PRODUCT FEATURES

Sarsilmaz firearms are being manufactured on the grounds of experiences gained by producing them for shooting, police and military services with high technology. Pistol is working mechanical lock system with semi-automatic firing system and single action in feature. Thanks to automatic firing pin safety, trigger safety, you can carry trustfully. Be comfortable with the layout and ergonomics pistol grip engagement set the goal of precision sighting to detect and it is possible to make the ignition. (Depending on the model)

*****Use life of our products are 10 (ten) years.
3.3. BASIC PARTS

Note: Sarsilmaz reserves the right to amend the content of model without any notice. There isn’t a safety lever on SAR 9T.
Rear Sight

Slide Lock & Release

Slide Serrations

Ambidextrous Safety Lever (There isn’t a safety lever on SAR 9T)

Striker Status Indicator

Left or Right Hand Use Magazine Release Button

Ergonomic, Changeable Side Plate (S, M, L)

Ergonomic, Changeable Back Strap (S, M, L)

Frame

Magazine

Ergonomic Trigger
3.4. FIREARM SPECIFICATIONS

SARSILMAZ is producing Semi-Automatic firearms especially for military and police services. When compared with its competitors SARSILMAZ differs from the others with its high performance and quality, what make it preferable by the police and military services.

- Firing Pin Safety
- Picatinny Rail
- Striker Status Indicator
- Steel Magazine

3 interchangeable side panels and back straps.

Complete with ambidextrous Safety (There isn’t a safety lever on SAR 9T)

4. PUTTING YOUR PRODUCT INTO SERVICE
4.1. PRELIMINARY PREPERATION

Firearms are generally protected with oil film on it. Before using your firearm, clean your firearm and make sure the barrel doesn’t have any excess oil. If there is excess oil, remove it by using a bore mop or patches to push through the barrel.

4.2. INSPECTING YOUR PISTOL

a. If there is a safety lever on your pistol, hold your lever on safety position during inspection. (Figure 1)

Skip this step if your pistol doesn’t have a safety lever.

b. Depress the magazine release and remove the magazine. (Figure 2)

c. Hold your safety lever on firing position if your pistol has a safety lever. (Figure 3)

⚠️ WARNING
Safety is only activated when striker is cocked. Do not try to change the position to safe if not cocked. Forcing the safety into position while not cocked can cause damage which in turn will void the warranty.
d. Pull the slide to the rear, check to see that the chamber is clear and the bore is not obstructed. (Figure 4)

e. Push the manual safety lever to the SAFE position. Pull the trigger while pointing the gun in a safe direction (Figure 5). Make sure that the firing pin does not drop.

f. Set the safety to FIRE, grip the pistol firmly and pull the trigger. Your firing pin should release during this step.

g. Move the safety lever to SAFE position again.

4.3. AMMUNITION

- Use only quality factory ammunition.
- Make sure that the caliber of the ammunition is compatible with your firearm (i.e. if your pistol is marked 9x19 your ammunition should coincide with 9 mm ammunition).
- Using over pressured cartridges or hand loads may not only cause damage to the firearm which will void the warranty but also can cause injury to yourself and/or bystanders.

4.4. FIRING

4.4.1. CHECKS AND SAFETY BEFORE FIRING

- Always keep the firearm pointed in a safe direction.
- Keep your fingers off the trigger and out of the trigger guard until you’re ready to shoot.
- Before loading be sure that any excess oil on the firearm is removed. Check to see that the chamber is clear (by pulling the slide to the rear) and the bore is not obstructed.
• It is not recommended that you load or unload your firearm anywhere other than a safe and designated area.
• Do not rely on the safety systems. Be sure you have read the manual carefully and understand it completely.

4.4.2. LOADING YOUR MAGAZINE

a. Hold the magazine with your non-dominant hand.
b. With your dominant hand, place a cartridge on the follower in front of the lips, press down and slide the cartridge completely back under the lips.
c. Repeat until the magazine is fully loaded. (Figure 6)

WARNING
While loading cartridges, be aware of not damaging magazine lips. Number of cartridges can be observed by holes on the rear side of magazine. Do not try to force more than maximum indicated rounds into the magazine. Crushed and crooked cartridges can affect the function. Inspect cartridges prior to loading.

4.4.3. ASSEMBLING YOUR FIREARM

a. Make sure your safety is engaged and finger is off the trigger. Push the magazine up into the magazine well until the magazine catch engages and locks the magazine in place. This can be accomplished with the slide locked in the rear position or with the slide in the closed position. (Figure 7) It is enough to insert magazine directly if your pistol doesn’t have a safety lever.
b. While the slide is closed, pull the slide to the rearward position. Release the slide and allow it to go forward into the close position. The slide will automatically take the cartridge from the magazine and load it into the chamber. If magazine is inserted while the slide is locked in the rear position, release the slide by using the slide release or by pulling rearward on the slide and releasing it. Do not allow your hand to follow the slide back. Let it go freely (Figure 8)
c. The firearm is now loaded and ready to fire. Always remember to keep the muzzle pointed in a safe direction while handling your firearm.
d. Hold your safety lever on safety position if your pistol has a safety lever.

4.4.4. SETTING YOUR LINE OF FIRE
The proper sight picture can be seen in (Figure 9)

4.4.5. FIRING
• Put your finger on the trigger then pull slowly. (Figure 10)
• Do not move from your target/shooting area until you have completed a safety check and made sure firearm is unloaded.

⚠️ WARNING
The slide of this pistol moves to the rear forcefully. Make sure to have correct hand placement before releasing slide as seen in Figure 7.
4.4.6. RELOADING YOUR FIREARM

Check chapters “LOADING THE MAGAZINE” and “LOADING THE PISTOL”.

4.4.7. UNLOADING YOUR MAGAZINE

In order to remove cartridges from the magazine, grip the magazine while using your thumb to unload. (Figure 12)
4.5. SECURING YOUR FIREARM
4.5.1. UNLOADING YOUR FIREARM

- The magazine is loaded and one is in the chamber.
- Point the muzzle of the firearm in a safe direction.
- Depress the magazine release and remove the magazine.
- Pulling rearward on the slide will eject the live round from the chamber.
- Rack the slide multiple times to ensure the chamber is empty.
- While holding the slide in the rearward position, engage the slide release to lock open.
- Visually check the chamber to be sure it is empty.
- By pressing “slide takedown”, release the slide.
- Aim your pistol at a safe direction by holding safety lever on firing position if your pistol has a safety lever.

5. MAINTENANCE AND CLEANING
5.1. MAINTENANCE AND CLEANING KIT

Maintenance and Cleaning Kit may contain the following items below:

- Brush x2  • Cleaning Rod  • Protecting Oil

5.2. DISASSEMBLING YOUR FIREARM

Good knowledge about the use and maintenance of your firearm is very important. Many of the shortcomings happen to occur from mistakes made during the gun maintenance. Cleaning, lubrication and protection are necessary and should receive special focus in order for the firearm to work properly and efficiently.

a. Make sure that the firearm is unloaded and the magazine is removed before disassembling the firearm for cleaning and maintenance.
b. Visually check to make sure there is no cartridge in the chamber.
c. Make sure that the firearm points in a safe direction and then pull the trigger.

d. Push down on the slide takedown. (Figure 13)
e. Remove the slide from the frame. (Figure 14)

f. Set the frame to the side. Flip slide upside down and remove recoil spring and guide rod assembly (Figure 15)

g. Remove the barrel from the slide. (Figure 16)

⚠️ WARNING
A basic wipe down of the frame is more than efficient. No further disassembly of the slide or frame is necessary. Any further breakdown should only be completed by authorized/approved gunsmiths.
5.3. MAINTENANCE AND CLEANING OF YOUR FIREARM

Be aware that proper cleaning and lubrication is essential for the reliable function, corrosion resistance, accuracy of the firearm and especially for your personal safety. All the experiences have shown that accidents mostly happen at the time of cleaning the firearm. After every use, cleaning and lubrication are recommended (especially the bore, which loses protective oils during firing). Excess oil and grease obstruction in the bore are very dangerous when firing and may cause damages to the firearm and serious injury to the shooter and bystanders. Never spray oil to the cartridges.

Read and follow the manufacturer’s warnings before using solvents and cleaners. Remember that you are responsible for the proper care and maintenance of your firearm.

a. Be sure that the firearm is unloaded.
b. In order to keep a firearm as possible as efficient it must be kept clean and covered with a slight of good quality oil to prevent corrosion. This is especially necessary after use.
c. For cleaning after use it is important that all residues of powder be removed from barrel and other adjacent using an appropriate Bristle brush. If particles of lead are detected in barrel, they must be scrubbed with oil. Once cleaned, lubrication should be done as picture described.
d. Wipe the slide assembly inside and out with a cloth or brush dampened with cleaning solvent to remove most of the dust and powder fouling. Carefully clean the slide rails as well.

1 - Side

2 - Barrel

3 - Recoil Spring & Rod

4 - Frame

5 - Magazine
BARREL: Please clean the barrel as written below

a. Clean the barrel with cleaning oil or chemical applied (gasoline, kerosene, etc.) copper/bronze made brush (steel and bristle brush not applicable), inserting through chamber nest . (Figure 17)

b. Inserting through chamber nest, clean with cleaning rod and cloth that is cleaning oil or chemical applied (gasoline, kerosene, etc.) (Figure 17A)

c. Inserting cleaning rod and cleaning cloth that is protective oil applied, pass through the chamber nest and apply throughout the barrel.

d. Lubricate the outer surface of barrel with few drops. (Figure 18)

e. Prior to firing, keep clear chamber of oil with a clean cloth.

f. Applying compressed air, clean the barrel following article “a”, if possible.
SLIDE: Please clean the slide as written below;

a. Clean with plastic made brush, plastic made- copper fiber brush, applied of cleaning oil or chemical (gasoline, kerosene, etc.)

b. Clean parts such as slide rails and root of extractor and keep slide clear of powder fouling. (Figure 19)

c. Apply compressed air if possible and dry it with a cloth.

d. Lubricate slide channels and joint face with protective oil. (Figure 20)

ATTENTION: Please avoid excessive lubricating.

FRAME: Clean the frame as written below.

a. Clean with plastic made brush, plastic made- copper fiber brush, applied of cleaning oil or chemical (gasoline, kerosene, etc.)

b. Apply compressed air if possible and dry the frame with a cloth.

c. Lubricate guide rails. Lubricate the backside of trigger bar with cleaning oil or grease oil (high viscosity required) (Figure 21)
RECOIL PIN: Clean the recoil pin as written below.

a. Clean with plastic made brush, applied of cleaning oil or chemical (gasoline, kerosene, etc.)
b. Apply compressed air if possible and use a cleaning cloth.
c. Apply protective oil slightly. (Figure 22)

5.4. ASSEMBLING YOUR FIREARM

a. Verify the pistol is clear of foreign matter. Insert the barrel into the slide. (Figure 23)
b. Insert the recoil spring guide assembly into the slide. (Figure 24)

c. Guide the slide onto the frame rails from the front. Once the slide is racked in the rearward position a click will indicate the slide takedown is secured in place. (Figure 25)

d. Racking the slide of the pistol, check the operation.

e. Check the function of trigger. Be sure that safety function works properly.

5.5. FUNCTION CHECK

- Following cleaning and maintenance, it is recommended to check the function of the firearm.
- Rack the slide rearwards and release a few times.
- Make sure the slide moves freely. Remember not to ride the slide (pull back and release).
- With safety on safe, pull the trigger in a safe direction. Make sure firing pin does not drop during this process.
- Switch safety to fire; pull the trigger in a safe direction. Make sure firing pin drops during this process.
5.6. MAINTENANCE OF YOUR MAGAZINE

5.6.1. DISASSEMBLING YOUR MAGAZINE

a. Make sure that the magazine is unloaded.
b. Using a punch or other small rod, press the floorplate retainer. (Figure 26)

c. Slide the floorplate halfway. (Figure 27)

d. Hold the floorplate retainer ease the floorplate off the magazine body. Remove floorplate retainer, magazine spring, and follower out of the magazine. (Figure 28)
**WARNING**
The magazine spring is being compressed during assembly. Support the magazine floorplate retainer and magazine spring with your thumb to control magazine spring tension. Uncontrolled release can cause injury. Wear eye protection.

5.6.2. CLEANING YOUR MAGAZINE

a. Clean the fouling in the magazine using a bristle brush while moving it lightly inside the magazine up and down. Wipe the outside and inside of the magazine with a clean cloth. (Figure 29)

b. Lightly lubricate inside of the magazine using a clean cloth with a couple of drops of oil. (Figure 30)

c. It is not necessary to clean your magazine after every use. Only clean if magazine follower is sticking or having feeding issues. If no issues arise, clean at least once every 6 months.

**WARNING**
Remember that using harsh solvents/chemicals that are not designed for firearm cleaning will void the warranty.

5.6.3. ASSEMBLING YOUR MAGAZINE

Assemble in reverse order.
6. TROUBLESHOOTING

If your firearm misfires with a live cartridge in the chamber, keep your firearm pointed in a safe direction for at least 10 seconds. Rack the slide to eject the faulty cartridge and continue firing.

The following table outlines the problems and their reasons as well as suggestions with respect to firing.

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>REASON</th>
<th>SOLUTION</th>
</tr>
